SLICE AWAY TIME, MONEY AND WASTE WITH THE PROCARE 24*7

IT STANDS TO REASON that to achieve excellent results you need the right tools. For colourists intent on building their clientele, this clever gadget could make a whole lot of difference...

The Procare 24*7 is a mini wonder – a fully automatic hair foil preparation system that cuts and folds foil at the touch of a button. This savvy slicer – available in a range of colours – can also improve your salon's profitability and free staff from prepping piles of foil strips. With more staff available, you can see more clients, ensuring your salon is highly productive.

"Our assistants used to hand prepare foils," says Tanya Hennessey (pictured, right), owner of Hair XS, in Nottingham. "Then we reviewed how long this took, using the calculator on www.hairfoil.com, and we ordered a 24*7 there and then." From the start, the 24*7 produced neat foils quickly and easily. "The money-saving is great," says Tanya. "Plus, when I was working towards my Colour Masters degree, the 24*7 was a Godsend, allowing me to focus on the style I was developing without wasting time on foil prep."

Once seduced, you'll be amazed at how easy the Procare 24*7 is to use. Choose the length and fold size you want and the amount of foils you need,

and the Procare 24*7 takes care of the rest. It's simple to load, too, as demonstrated on www.hairfoil.com.

The Procare 24*7 is a brilliant device for every salon; neat enough to fit into any setting while working hard and looking fabulous. And you'll get less waste, spend less time prepping, have an invaluable pile of immaculately presented foils and enjoy a brilliant aftercare service, too. If you're determined to see your colour business grow, this will make a real difference.
